Tugas Jobsheet 2

A. Code

- dragon

Dragon.java

```java
public class Dragon {
    int x, y, direction;

    public Dragon(int newx, int newy, int newDirection) {
        x = newx;
        y = newy;
        direction = newDirection;
    }

    public void changeDirection(int newDirection) {
        direction = newDirection;
    }

    public void move(int steps) {
        switch (direction) {
            case 0:
                System.out.println("Dragon tidak bergerak");
                break;
            case 1:
                y += steps;
                System.out.println("ke atas "+ steps);
                break;
            case 2:
                x += steps;
                System.out.println("ke kanan "+ steps);
                break;
            case 3:
                y -= steps;
                System.out.println("ke bawah "+ steps);
                break;
            case 4:
                x -= steps;
                System.out.println("ke kiri"+ steps);
                break;
        }
    }

    public void printStatus(){
        System.out.println("Steps : " + direction);
        System.out.println("Dragon : (" + x + ", " + y + ")");
        System.out.println("====================================");
    }
```

- dragon main

DragonMain.java

```java
public class DragonMain {
    public static void main(String[] args) {
        Dragon dragon1 = new Dragon(0, 0, 0);
        System.out.println("Dragon 1 posisi awal : ");
        dragon1.printStatus();
        System.out.println("Dragon 1 bergerak ke kanan 3 langkah : ");
        dragon1.changeDirection(2);
        dragon1.move(3);
        dragon1.printStatus();
        System.out.println("Dragon 1 bergerak ke atas 2 langkah : ");
        dragon1.changeDirection(1);
        dragon1.move(2);
        dragon1.printStatus();

    }
}
```

B. Output

```
Dragon 1 posisi awal :
Steps : 0
Dragon : (0, 0)
====================================
Dragon 1 bergerak ke kanan 3 langkah :
ke kanan 3
Steps : 2
Dragon : (3, 0)
====================================
Dragon 1 bergerak ke atas 2 langkah :
ke atas 2
Steps : 1
Dragon : (3, 2)
====================================
```
